1981–1982

- A 4325-2 U 6/83 -

Voluntary Support of Education

Prepared by the Council for Financial Aid to Education and jointly sponsored by the Council for Advancement and Support of Education and the National Association of Independent Schools.

Highlights

Higher Education

National Estimates of Voluntary Support of Higher Education indicate that

- Total voluntary support rose $630 million in 1981-82 to an estimated $4.86 billion. Almost one-quarter of this increase came from two bequests by an alumnus totaling $115 million and a corporate gift-in-kind valued at $30.4 million
- Corporations increased their contributions by 25.4 percent to $976 million, a record share of 20.1 percent of total support. Nearly $100 million of the increase was from noncash gifts
- Contributions for student aid increased 22.5 percent

Reports from Participating Institutions show that

- Total support of the 827 institutions reporting in both 1980-81 and 1981-82 increased by 16.0 percent. Gifts from alumni and corporations each rose by more than 23 percent. Support for student aid grew by 22.6 percent
- The average alumni gift to the annual fund increased to $104.16, and solicitation effectiveness reached a record 18.9 percent, the highest level since 1967-68

Private Secondary and Elementary Schools

Voluntary Support of Independent Schools increased faster than inflation

- Support for the 326 schools reporting in the two surveys rose by 27.7 percent, the highest increase since 1972-73. Corporate gifts to these schools expanded by 23.3 percent
- Gifts from nonalumni individuals were a record 43.3 percent of all support
- Unrestricted gifts were a record 57.0 percent of total contributions. Gifts for capital purposes were twice as large as those for current operations

Additional copies at $18.00 per copy prepaid are available from the Council for Financial Aid to Education, 680 Fifth Avenue, N.Y., N.Y. 10019

This report was prepared by the CFAE Division of Research. May 1983.

A grant from the Reader's Digest Foundation assisted CFAE in meeting the costs of producing this survey.

Preface

This twenty-third *Survey of Voluntary Support of Education* has been jointly sponsored by the Council for Financial Aid to Education, the Council for Advancement and Support of Education and the National Association of Independent Schools, with the cooperation of several other national organizations. It is the latest in a series of studies of educational philanthropy dating from 1954-55.

The definitions used in the 1981-82 survey are as defined in *Gift Reporting Standards for the CASE-CFAE-NAIS Survey of Voluntary Support of Education, 1981*, and are essentially those used in prior years. Voluntary support excludes income from endowment and other invested funds as well as all support received from federal, state and local governments and their agencies; in editing the survey questionnaires, CFAE deleted all income from these sources when so identified by the reporting institution. Any enrollment figures not supplied by the colleges and universities were taken from the *Education Directory, 1981-82*, published by the National Center for Education Statistics, U.S. Department of Education.

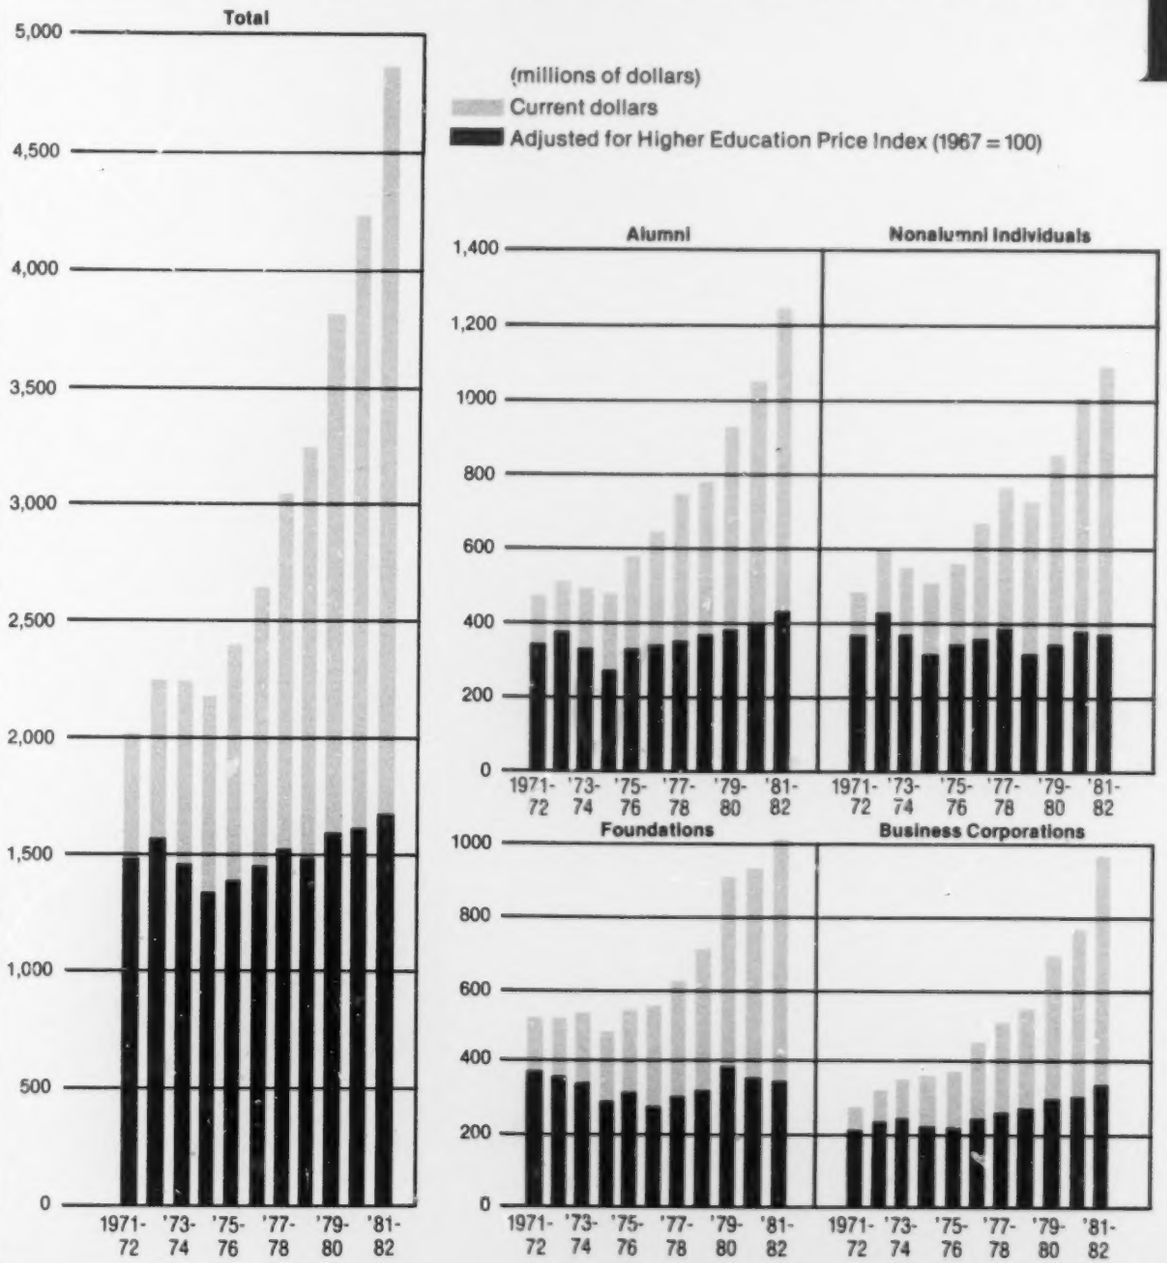
Since 1965-66, the survey information has been processed by computer, and most of the data supplied by the participating institutions have been stored on magnetic tape. The ready availability of this store of information makes it possible to undertake supplementary studies of educational philanthropy.

Survey Participation, 1981-82

	Four-Year Colleges and Universities	Two-Year Colleges	Private Precollege Schools	Total
Invited to participate	1,603	646	844	3,093
Completed and tabulated questionnaires	985	116	486	1,587
Not tabulated:				
Unable to participate	2	–	1	3
No support	8	39	5	52
Reporting too late or in totals only	6	–	–	6
Total response	1,001	155	492	1,648
Response rate	62%	24%	58%	53%
Total amount tabulated	$4,052,143,141	$34,060,456	$295,043,761	$4,381,247,358
Too late or in total only	$ 28,592,266	–	–	$ 28,592,266
Total amount reported	$4,080,735,407	$34,060,456	$295,043,761	$4,409,839,624

To all those who filled out the questionnaires, to the institutions they represent, and to the cooperating associations in the educational community, CASE, CFAE and NAIS express their gratitude.

Chart 1. Estimated Voluntary Support of Colleges and Universities by Major Sources and in Total



I National Estimates

- Total voluntary support rose $630 million in 1981-82 to an estimated $4.86 billion. Almost one-quarter of this increase came from two bequests by an alumnus totaling $115 million and a corporate gift-in-kind valued at $30.4 million
- Corporations increased their contributions by 25.4 percent to $976 million, a record share of 20.1 percent. Nearly $100 million of the increase was from gifts-in-kind and other property
- Contributions for student aid increased 22.5 percent and for other purposes by 35.6 percent

Total contributions to colleges and universities climbed $630 million to an estimated $4.86 billion in 1981-82. This was a 14.9 percent increase over the $4.23 billion estimated in 1980-81. Three large gifts account for 23.0 percent of this increase, two bequests totaling $115 million from an alumnus and a $30.4 million corporate gift of a newsreel film library.

The growth in voluntary support easily surpassed the inflation rate of 8.2 percent as measured by the Consumer Price Index (CPI) and the 9.9 percent growth in the cost of goods and services purchased by colleges and universities, as measured by the Higher Education Price Index (HEPI) (see **Chart 1**). This was the first time since 1976-77 that the HEPI grew faster than the CPI. In terms of real purchasing power for the higher education dollar, voluntary support increased 4.4 percent between 1980-81 and 1981-82, and 18.4 percent in the five years since 1976-77.

By Source

Three donor groups each gave over $1 billion in 1981-82 — alumni, nonalumni individuals and foundations, as can be seen in **Table 1**. More than half of the increase in alumni gifts came from the $115 million in bequests

from Edward Mallinckrodt, Jr., to Harvard University and Washington University. Religious denominations increased their support for the first time since 1978-79.

Gifts-in-Kind Swell Total

Corporations expanded their giving by a larger percentage than any of the other large donor groups, adding 25.4 percent to their 1980-81 total. Several forces came together to produce this $198 million increase in the face of two years of declining profits. It is estimated that about half of the increase consisted of equipment, gifts-in-kind and other tangible property. The gift to UCLA of the newsreel film library valued at $30.4 million by the Hearst Corporation is the largest example of this type. The liberalized rules for valuing gifts of inventory for use in research, permitted by the Economic Recovery Tax Act of 1981 (ERTA), have encouraged many companies to expand already existing programs of equipment donations. There is also an advantage to making such noncash gifts in a period of lower profits.

There is a problem in reporting these gifts, however. Corporations report them at the value used on their tax returns; that is, at or somewhat above manufacturing costs. The donees, on the other hand, value them at list price. As such gifts increase, the differences in dollar values reported by the corporate donors and by the academic donees may become considerable. Future surveys of corporations and of colleges and universities will ask about these gifts-in-kind in greater detail.

Many corporations have been able to expand their grants to education despite lower profits because of company-sponsored foundations. These foundations were established to insulate the flow of contributions from the ups and downs of the business cycle. Typically, companies have made donations to their foundations in profitable years; the foundations can use earnings on their reserves or even the assets themselves in leaner times. A CFAE/Conference Board study of corporate contributions in 1981 found that almost half of the 789 respondents had foundations. Overall, payments into these foundations during 1981 were lower than the grants made by the foundations themselves, but the earnings on the accumulated assets enabled expansion of grant programs. When necessary, the foundations also drew upon their assets to fund their programs.

*Includes bequests from Edward Mallinckrodt, Jr., of $77 million to Harvard University and $38 million to Washington University for "other" capital purposes.
**Includes newsreel film library valued at $30.4 million from Hearst Corporation to University of California at Los Angeles for "other" purposes.
†Includes $115 million in bequests and $30.4 million gift-in-kind.

Corporations more than doubled their gifts to colleges and universities between 1976-77 and 1981-82. This was the only donor group to do this, although alumni came close. Growth in grants from each of the four major donor groups outpaced the rises in both the CPI and the HEPI between 1976-77 and 1981-82, while those from religious denominations and from other sources did not.

By Purpose

Unrestricted gifts continued to be the largest single category of voluntary support, although its share of total support decreased in 1981-82 to 27.7 percent from 29.8 percent the year before. The largest increase in gifts was for "other" purposes, primarily because of the Mallinckrodt and Hearst gifts. Funds for faculty compensation hardly rose at all, after a large increase in 1980-81 over 1979-80. The big push by the fundraisers in 1981-82 was for student aid funds, a reflection of concern that federal funds for student aid would be cut drastically. For the first time these gifts almost equaled those for research.

Between 1976-77 and 1981-82 gifts with restrictions on their use all grew sufficiently fast to outpace the increase in the CPI, while unrestricted funds did not. Since

the HEPI did not rise as fast in those five years as the CPI, unrestricted gifts as well as those for specific purposes grew in terms of their purchasing power for the higher education institutions.

In the last several years donors have increasingly targeted their grants. In 1976-77 almost a third of the contributions were unrestricted; by 1981-82 slightly more than a quarter were. The surveys have seen a big rise in grants for "other" purposes, indicating that future surveys should ask for more details about their actual purposes.

Gifts for capital purposes grew at a slightly faster rate than those for current operations between 1980-81 and 1981-82 and from 1976-77 to 1981-82, although in all years gifts for current operations comprised about 60 percent of total support received. During the 1950s and 1960s more than half of the private gifts raised by colleges and universities were for capital purposes, but the pattern changed at the beginning of the 1970s. Ever since 1969-70 more than half of total estimated voluntary support has been channeled into current operations. Two events may help account for this change. Public four-year colleges are raising an increasing share of total private dollars, and gifts to public institutions are for current operations in a ratio of about two to one. In addition, corporations have been increasing their share of all giving, particularly in the last half of the decade, and in general they give about three times as much money for current operations as for capital purposes.

LONG-TERM PERSPECTIVES

Levels of voluntary support are related to several economic factors, all of which affect capacity and motivation to give, especially on the part of the principal donors to colleges and universities. The relationships are imperfect, however, since higher education is only one of the philanthropies appealing to donors for funds.

Some factors affect all donors; other seem to be related more closely to specific donors. Inflation, for example, affects all givers, although in ways that are not yet fully understood. The ability and desire of individuals to make donations are related to levels of disposable personal income, to tax laws and regulations and to perceptions of need. Corporate contributions are affected by profits, but the relationship in recent years has been far from direct. Although current contributions budgets are often linked to profits in previous years, other factors are obviously involved since contributions budgets have been growing despite the recent profit downturns.

Corporate foundations, for example, helped maintain stable contributions programs for many companies. The levels of giving by these foundations may be tied more to returns on investment of foundation assets than to their sponsors' profits. The increasing emphasis on corporate social responsibility certainly encourages corporate contributions, but so far its effect cannot be measured quantitatively. Finally, the level of general foundation grants is related to the income they receive from invested assets as well as to tax regulations concerning payouts.

Economic Factors

Several developments in the economy between 1976-77 and 1981-82 were of significance to voluntary support. The Consumer Price Index, a common measure of inflation, rose 59.5 percent over the five years. The yearly increases reached double-digit levels in two years but slowed considerably in 1981-82, dropping almost to the rates of the early part of the period. All of the other pertinent economic indicators except corporate profits rose at even faster rates. Disposable personal income grew by 67.5 percent, and dividend and interest income more than doubled. Corporate pretax net income, in contrast, rose only 12.9 percent. The gross national product, however, increased by 64.9 percent.

During this period voluntary support rose 82 percent. Increased support from the three main donor groups — individuals (alumni and nonalumni), foundations and corporations — all contributed to this growth, but the changes did not match those in the economic factors associated with them. Gifts from individuals, exclusive of bequests and deferred gifts, for example, rose faster than disposable income. Foundation grants, on the other hand, expanded much more slowly than dividend and interest income. And corporate contributions more than doubled despite only a modest growth in profits.

Adjusting the economic indicators and giving patterns for inflation uncovers some interesting relationships between them during the period between 1976-77 and 1981-82. In constant 1967 dollars, gifts from individuals grew by 16.1 percent, more than three times the growth in disposable personal income. Grants from foundations increased only 12.6 percent, nowhere near matching the 44 percent rise in dividend and interest income. Corporate support expanded 37.2 percent despite a 29.4 percent drop in corporate pretax net income. Total voluntary support of higher education increased 14 percent while the gross national product expanded only 3.4 percent.

In the five-year period from 1976-77, therefore, all three of the major donor groups increased their support of colleges and universities in both current and inflation-adjusted dollars, while the economic factors associated with their giving capacity followed different patterns. Individuals expanded their contributions faster than the indicators generally associated with their income resources. Colleges and universities evidently pleaded their cases sufficiently well to convince alumni and other individuals to raise the level of their giving to this particular cause. Growth in foundation gifts did not keep up with the rise in dividend and interest income, perhaps because of the relaxed payout requirements of the Economic Recovery Tax Act of 1981 and perhaps because other philanthropies grew in interest to the foundation grantmakers. Corporate support not only rose faster than gifts from other sources but also grew in the face of lower profits. Corporate contributions programs evidently increased the share of grants made to higher education institutions. The growth was also partly possible because company-sponsored foundations benefited from sharply higher dividend and interest income from their invested reserves. In addition, some of the growth in corporate contributions stemmed from expanded gifts of their own manufactured products, which are not as closely related to profits as are cash contributions. How much ERTA will affect growth in this kind of gift will not be seen at least until results are available from the voluntary support survey for 1982-83, the first full academic year after it took effect.

Institutional Expenditures and Voluntary Support

Although voluntary support is of continuing concern to institutions of higher education, changes in enrollment and their consequent impact on institutional expenditures more directly affect the economic health of the system. As can be seen in **Table 2**, institutional expenditures rose in double-digit percentages during the decades between 1949-50 and 1970-71. Enrollment increases and inflation were only partially responsible for these rises. Then in the first half of the 1970s, colleges and universities slowed the expansion of their budgets as enrollment increases slowed, but inflation began eating away at any increases in funding. Expenditures per student, for example, apparently grew between 1970-71 and 1975-76, but when these figures are adjusted for inflation, real dollar allocations per student actually declined. The picture in the last half of the decade was brighter until 1980-81. Total expenditures continued to increase, and enrollment growth slowed sufficiently so that expenditures per student almost kept pace with inflation. The changes between 1980-81 and 1981-82 then erased some of this improvement.

Voluntary support, on the other hand, has showed quite different patterns of change. In the decades prior to 1965-66 it recorded large increases. For the next ten years it grew at an almost constant average annual rate that was not high enough to prevent support per student in both current and adjusted dollars from declining. The growth patterns have changed considerably since then. Since 1975-76 estimated voluntary support has seen extraordinary increases each year and has been more important per student. The percentage of institutional budgets met by voluntary support has been creeping up during the period, although it has still not reached the levels seen in the 1950s and 1960s.

The future continues to hold uncertainties that will put pressures on institutional budgets. Although the cuts in federal student aid monies were not as great as had been feared, institutional aid budgets are hard pressed to keep up with tuition increases. Many students have had to enroll in public institutions rather than in the higher-priced private colleges, but some state institutions have been forced to limit enrollment increases when state appropriations were not increased concomitantly. Many of the states – especially those hit hardest by the recession – have not only put a lid on increases in appropriations but also in a few instances withdrawn funds already committed. Inflation has slowed, however. Some of the pressure from increased enrollment will lessen because of demographic changes, although they may be partially offset by an increase in adult students because of the continuing need for trained manpower in today's technological society. Emphasis on raising private funds will likely expand, particularly at the public institutions. The competition from other charitable organizations for private dollars will increase. Nonetheless, if the evidence from the last several surveys is any indication and if higher education continues to communicate its needs persuasively, donors will respond.

Table 2. Voluntary Support in Relation to Enrollment, Inflation and Institutional Expenditures

Year	Total Enrollment (thousands)	Price Indices (1967 = 100) CPI	HEPI	Institutional Expenditures Total (billions)	Per Student (Current)	Per Student (CPI)	Estimated Voluntary Support Total (Millions)	Per Student (Current)	Per Student (CPI)	As % of Institutional Expenditures

II Survey Results

- A record total of 1,101 institutions reported receiving $4.086 billion in voluntary support in 1980-81, an average of $3.711 million per institution
- Total support of the 827 institutions reporting in both 1980-81 and 1981-82 increased by 16.0 percent. Gifts from alumni and corporations each rose by more than 23 percent. Support for student aid grew by 22.6 percent
- Bequests and deferred gifts grew in importance as a source of gifts from individuals, fueled by two bequests totaling $115 million
- The average alumni gift to the annual fund increased to $104.16, and solictation effectiveness reached 18.9 percent, the highest level since 1967-68

A survey such as this reports two types of results: 1) details of the support raised during the year by the respondents – how much was given, by whom, to whom and for what purpose; and 2) changes from one year to the next and over longer periods of time. Tabulations of the details for the survey year are presented in tables that look at each of these aspects.

Analyzing the data over time is more difficult. The number and characteristics of respondents vary in unknown ways from year to year. Although many institutions reply every year, some drop out and some respond after a hiatus of a year or more. Meaningful comparisons require identical samples in the two periods. This analysis, therefore, compares a "core" group of institutions participating in two successive surveys.

The Recipients

Survey participants reported good news in 1981-82. The 1,101 colleges and universities that replied were the highest number since the survey was begun in 1954-55. They reported receiving $4.086 billion, an increase of $768 million over the $3.318 billion received by 928 colleges in 1980-81 (see **Table 3**).

For the first time three classes of institutions each received more than $1 billion – the private universities, the private coeducational colleges and the four-year public institutions. The private institutions, however, still dominate the sample. Their number was 2.8 times the number of four-year public colleges, and they raised 2.3 times as much money. The four-year institutions far outnumbered the two-year colleges and raised many times more voluntary support.

These proportions have been changing gradually over the last ten years. The percentage of private institutions has remained fairly constant at about 66 percent, but their share of total support has declined from 77.0 percent in 1971-72 to 69.4 percent in 1981-82. The relative importance of the public institutions, on the other hand, has risen. In numbers, they have increased from 20.3 percent in 1971-72 to 23.4 percent in 1981-82, and their share of total support has risen from 21.6 percent to 29.8 percent during the same period. The two-year institutions, which were 14.5 percent of the total number of respondents in 1971-72 and reported 1.4 percent of the gifts, declined in 1981-82 to 10.5 percent of the sample with 0.8 percent of total support.

Table 3. Voluntary Support by Type of Institution (000 omitted)

Type of Institution	1980-81* No.	1980-81* Amount	1980-81* Average per Institution	1981-82 No.	1981-82 Amount	1981-82 Average per Institution	% Change in Average	Core Group % Change in Total Support	Core Group No.
Private Universities	74	$1,327,057	$17,933	74	$1,513,497**	$20,453	+14.0	+14.0	74

Private Coeducational Colleges	439	780,709	1,778	496	1,018,482	2,053	+15.4	+18.5	404
Professional & Specialized Schools	64	126,022	1,969	73	155,347	2,128	+ 8.1	+29.7	46
Total Private Four-Year	655	$2,367,416	$ 3,614	727	$2,835,462	$ 3,900	+ 7.9	+15.6	600
Public Four-Year Institutions	209	929,236	$ 4,446	258	1,216,681†	4,716	+ 6.1	+17.4	186
Total Four-Year	864	$3,296,652	$ 3,816	985	$4,052,143	$ 4,114	+ 7.8	+16.1	786
Two-Year Institutions	64	21,413	335	116	34,060	294	−12.2	+ 3.0	41
GRAND TOTAL	928	$3,318,065	$ 3,576	1,101	$4,086,204	$ 3,711	+ 3.8	+16.0	827

*Figures shown differ slightly from those published in the 1980-81 survey report; three institutions have been reclassified, and the amount of support reported by them in 1980-81 has been allocated to the class in which they reported in 1981-82.
**Includes $115 million in bequests. See Table 1.
†Includes $30.4 million gift-in-kind. See Table 1.

Comparing the dollar totals of the support received by the different groups of institutions in 1980-81 and 1981-82 can be misleading, however, because of the larger number of institutions in 1981-82. Computing average support per institution in each class compensates to some degree for these disparities. The results are quite varied. Three groups reported either very small increases or a decrease; four reported increases surpassing the 3.8 percent rise in average support for all institutions.

A more accurate indication of year-to-year changes comes from the core group. Here the rates of change far exceed those indicated by the institutional averages. These differences highlight the fact that the noncore institutions, those that reported in 1980-81 but not in 1981-82 and those that replied only in 1981-82, had different characteristics from the core group. The new participants in 1981-82 reported on average smaller amounts of voluntary support than did the core institutions, thus lowering both the group averages and the rates of change. When the members in the total sample were more similar to the core members in any given group – as with the private universities and the private coeducational colleges – the two rates of change were closer.

The total core group, as well as several institutional classes within it, exhibited large rates of increase from 1980-81 to 1981-82. A look at the details of the reports from the institutions in these groups helps explain these changes. Of the core professional and specialized institutions, 29, or 63.0 percent, reported increases, ranging from 1.7 percent to 285.9 percent. One-third of the increases were greater than 50 percent and included 4 triples and 2 doubles. Another third increased their voluntary support between 25 percent and 49 percent. Of the private coeducational colleges, an extraordinary two-thirds reported increases, one-third of those being at least 40 percent or more. The support at 6 colleges quadrupled, at 7 tripled and at 16 doubled. Many of these increases were at institutions raising more than the average $1,778,000 per private coeducational college in 1980-81. Of the public four-year institutions, an even larger percentage reported increases – 69.9 percent; one-third of those were increases of 40 percent or more, with 2 quadrupling, 1 tripling and 15 doubling. Although some of these spectacular increases were at institutions receiving far below the average $4,446,000 per public institution in 1980-81, others were at institutions reporting above-average amounts of voluntary support. The University of California at Los Angeles recorded one of the largest increases as a result of a gift from the Hearst Corporation of a portion of its newsreel film library, valued at $30.4 million.

The number of core institutions varies from year to year, as does the number of total respondents. Table 4 shows the variations in the percentage changes in support reported by the core colleges in each pair of survey years since 1975-76 versus 1974-75. The base year of 1974-75 was chosen since that was the last year in which a decline in voluntary support from the previous year was recorded.

Despite the fact that total voluntary support has risen each year since then, the experiences of the core institutions vary considerably by type of institution. Four groups have reported increases in each of the periods. Support at the private universities and the public four-

*Includes nonrecurring transfer of $105 million from the Emily and Ernest Woodruff Fund, Inc., to Emory University for unrestricted endowment.
**Includes $115 million in bequests. See Table 1.
†Includes $30.4 million gift-in-kind. See Table 1.

year colleges has grown at a fairly consistent rate. The private women's colleges and the two-year institutions have shown much wider swings. The other three classes have swung between increases and decreases over the period. Especially with these latter groups, therefore, an analysis of only a single year presents a distorted picture of the group's fundraising results.

Although the patterns of yearly increases and decreases are of interest, changes over longer periods are more important. Here the private professional and specialized and the public four-year institutions stand out. Their rates of increase since 1974-75 exceeded the 128.9 percent increase for all institutions by a wide margin. Recent surveys have recorded the increasing success of public institutions in raising private gifts.

The Donors

Historically individuals and foundations have provided about 70 percent of the voluntary support received by colleges and universities, corporations between 14 and 18 percent, and the other donor groups the remainder. In the last several years, however, there has been a slow change in those patterns. The proportion contributed by corporations has been rising and that by foundations decreasing. Their two shares are almost equal in 1981-82, as shown in **Chart 2**. Individuals have consistently provided about 48 percent of all support. In some years alumni donations have been larger than those from non-alumni, as was the case in both 1980-81 and 1981-82. In other years, however, the situation has been reversed.

These relationships are shown in a slightly different way in **Table 5**. The largest average dollar contribution received by each institution in 1981-82 was from alumni and the next largest, from other individuals. The difference in the average amounts received from foundations and corporations narrowed.

The different composition of the total samples in 1980-81 and 1981-82 produces similar but smaller rates of change in the institutional averages from those reported by the core institutions. The overall trends are consistent, but the total samples by themselves do not provide totally accurate comparisons because they represent different groups of institutions.

Special Forms of Giving

Donors make contributions in several special ways, among them bequests and deferred gifts (e.g., life-income contracts), through corporate matching-gift programs and to the annual fund.

Information about *bequests* and *deferred gifts* and their relative shares of individual gifts in 1980-81 and 1981-82 are shown in **Chart 3**. Deferred gifts claim a fairly consistent share of gifts from individuals over the years. The proportion of contributions coming from bequests, on the other hand, varies randomly over time and also according to the type of institution. In general, bequests are much less important to two-year institutions and public four-year institutions. Their importance to professional and specialized schools varies considerably from year to year. In 1981-82, for example, there was a large increase in the percentage of individual support from bequests to these institutions. At sev-

eral schools the value of bequests multiplied several times over, and $2.5 million in bequests at one institution made up almost half of all its gifts from individuals. The Mallinckrodt bequests to Harvard University ($77 million) and Washington University ($38 million) help explain why 34.2 percent of all alumni and nonalumni gifts to the private universities in 1981-82 came from bequests.

Corporate matching-gift programs continued to be an important way for corporations to support colleges and universities. The respondents to the 1981-82 survey reported receiving $63.9 million from matching-gift support, or 7.8 percent of total corporate grants. The average match per gift was $211.32, up 2.3 percent from the $206.62 average match in 1980-81.

The percentage of total corporate contributions derived from matching funds and the average match per gift varied considerably by type of institution, however. Private institutions received almost 80 percent of these gifts, although the public four-year institutions have received an increasing share in the last five survey years. They received 21.5 percent of corporate matching-gift support in 1981-82.

The degree to which corporate support comes from matched funds also varies by type of institution. The women's and men's colleges received almost one-third of their corporate support through matching gifts. At the public four-year colleges and the two-year institutions, on the other hand, matching dollars accounted for only about 3 percent of their corporate gifts.

The average match from corporations also varies according to institutional type. In general, the match is larger at the private institutions than at either the public four-year colleges or the two-year institutions, although the disparity is lessening. The largest average match – $230.65 – goes to the private universities. The average match for all private colleges is $225.41, that for the public four-year institutions $173.21. These differences reflect the greater loyalty of alumni to private institutions as well as the greater reliance of the private institutions on the contributions of individuals.

Technical Notes:

A. In the listing on the following pages, Column 22 does not purport to show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

B. In some instances the number of institutions listed is greater than the number tabulated, for two reasons: (1) some multicampus institutions are shown in summary as well as in detail and (2) some of the component professional schools of major institutions are also listed separately.

(Continued from page 10)

The Annual Fund

The *annual fund* has historically been an important mechanism for raising unrestricted money from alumni, especially among private institutions. Since 1971-72, for example, as shown in **Table 6**, alumni gifts to the annual fund have ranged from 34 percent to 40 percent of total alumni support. In 1981-82 alumni gifts to the annual fund accounted for 35.4 percent of all alumni contributions, slightly less than the 38.0 percent share in 1980-81. Despite this, the average gift passed the one-hundred-dollar mark for the first time, and the effectiveness of annual solicitations grew to 18.9 percent, the highest level since 1967-68.

The five-year period between 1976-77 and 1981-82 has seen a higher average annual growth in both total alumni support and alumni gifts to the annual fund than any previous five-year period. The number of alumni donors rose an average of 6.1 percent a year, the total of their gifts grew on average by 12.2 percent each year, and the average size of their gifts increased by an average 5.7 percent annually.

As can be seen in **Table 7**, the size of the average gift as well as solicitation effectiveness vary greatly by type of institution. The private colleges and universities rely more on alumni support and elicit greater loyalty from their alumni than do the public four-year and the two-year institutions. There is as yet no sign that this historic pattern is changing. The average growth rates in the size of the average alumni gift to the annual fund have been almost identical for all classes of institutions since 1971-72, although the sizes of the average gifts themselves are quite different.

Table 6. Alumni Support of Colleges and Universities and the Annual Fund

Year	Institutions Reporting	Number of Alumni Donors to Annual Fund	Alumni Gifts to Annual Fund	Average Gift	Solicitation Effectiveness	Total Alumni Support

*Includes $115 million in bequests for capital purposes and $30.4 million gift-in-kind for current operations. See Table 1.

The Purposes

Donors changed the purposes for which their gifts were made in 1981-82, as can be seen in both **Chart 4** and **Table 8**. Chart 4 shows that unrestricted gifts decreased in importance in 1981-82, while student aid and "other," unspecified but restricted, purposes became larger targets for donations.

These patterns are exhibited in a different way in Table 8. Although the largest average dollar amounts for any single category were unrestricted, the total amounts that were restricted were greater. A record 73.3 percent of the gifts to colleges and universities in 1981-82 were restricted.

The percentage changes in the averages per institution for each purpose were different from those for the core group, although the patterns were similar. These differences occur because of the different characteristics of the institutions in the total samples of 1980-81 and 1981-82.

The increase in funds designated for student aid is understandable. The cuts in federal funding for student aid programs proposed in 1981 spurred the colleges and universities to seek more gifts for this purpose and encouraged donors to respond favorably. As has been seen in previous surveys, increasing amounts of support have been designated for "other" areas not specified in the survey questionnaire. The large increase in 1981-82 included the two large and unusual items – the Mallinckrodt bequests of $115 million to Harvard University and Washington University and the $30.4 million gift-in-kind from the Hearst Corporation to UCLA.

Although there was an increase in funds for capital purposes in 1981-82, partially because of the Mallinckrodt bequests, these funds still made up less than half of all voluntary support. Despite the large number of capital fund drives in the last several years, current operations have claimed over half of the total gifts each year since 1968-69.

PRIVATE SECONDARY AND ELEMENTARY SCHOOLS

Survey Results

- A record 486 respondents received $295 million in 1981-82. Average support of $607,086 was 8.3 percent higher than the $560,742 average for the 378 schools reporting in 1980-81
- The year-to-year increase in total support for the 326 schools responding in both 1980-81 and 1981-82 was 27.7 percent, the highest increase since 1972-73
- Gifts from nonalumni individuals were a record 43.3 percent of all support. Unrestricted gifts were a record 57.0 percent of total contributions. Gifts for capital purposes were twice as large as those for current operations
- Corporate support, a record 3.8 percent of all gifts, was mostly unrestricted, although 34.1 percent was given for physical plant. Corporate gifts at the 326 core institutions rose 23.3 percent

A record 486 secondary and elementary schools participated in the 1981-82 survey. They reported $295,043,761 in voluntary support, versus $211,960,362 received by 378 schools in 1980-81. The average $607,086 per school in 1981-82 was 8.3 percent higher than the average $560,742 received by each school in the previous year.

Since the numbers reporting in these two years are quite different, a better picture of the change between the two years comes from the experiences of the core group of 326 schools participating in both 1980-81 and 1981-82. These schools reported a rise of 27.7 percent, the highest increase reported by core institutions since 1972-73. This was well above the 8.2 percent inflation rate of 1981-82, as measured by the Consumer Price Index.

Table 9. Voluntary Support of Independent Schools by Source, 1981-82

Source	Current Operations	Capital Purposes
Business Corporations	$ 4,669,423 (414)	$ 6,546,241 (244)
Religious Denominations	1,559,788 (62)	211,799 (19)
Alumni	31,145,041 (434)	60,321,452 (332)
Nonalumni Individuals	42,873,717 (472)	84,801,745 (404)
Foundations	10,336,082 (360)	41,808,922 (313)
Fund-Raising Consortia	903,532 (52)	320,362 (15)
Other	5,095,752 (181)	4,449,905 (105)
GRAND TOTAL (486)	$96,583,335	$198,460,426

(Figures in parenthesis show the number of schools reporting.)

As in the past alumni and nonalumni individuals provided almost three-quarters of the support reported by the schools. Nonalumni support constituted the highest share ever seen in this survey — 43.3 percent. Gifts from alumni, on the other hand, accounted for their lowest share of all support, 31.0 percent, since 1972-73. Corporations increased their share of total gifts, although the total amount of dollars is still small. The proportion of total gifts awarded by foundations fell to 17.7 percent from 18.4 percent in 1980-81.

These patterns are confirmed by the reports from the core institutions. Gifts from nonalumni individuals at those schools grew by an extraordinary 53.4 percent, while alumni contributions rose 10.3 percent and corporate grants expanded 23.3 percent. Foundation support increased by 20.2 percent, a smaller increase than that for all gifts.

There are several ways in which gifts can be made; most of them exhibited increases in 1981-82 over 1980-81. The average alumni gift to the *annual fund* increased 3.2 percent from $114.26 to $117.87. A consistent 26.7 percent of the alumni responded to the annual request, about the same as the 26.9 percent contributing in 1980-81. The value of *bequests* in 1981-82 was 2.5 times that of 1980-81, while *deferred gifts* were almost a third larger than in the previous year. The two combined accounted for 19.6 percent of support from individuals, a higher proportion than in any previous year. *Corporate matching gifts*, although up 22.6 percent to $3.8 million, declined both as a percentage of total gifts — 1.3 percent — and as a percent of all corporate contributions — to 34.0 percent from 44.6 percent in 1980-81. Although matching dollars are still the only corporate money received by many secondary schools, more schools are successfully seeking other kinds of corporate grants.

Unrestricted gifts have historically provided a major share of support to the independent schools, and 1981-82 was no exception. A record 57.0 percent of all gifts were unrestricted. The shares of gifts designated for the other purposes asked about in the survey were quite similar to those in the last several surveys with one exception. Gifts for physical plant accounted for 21.3

The Ten Schools Reporting the Highest Totals of –

Total Voluntary Support:

Albuquerque Academy (NM)	$23,169,933
Phillips Exeter Academy (NH)	8,458,854
Hotchkiss School (CT)	5,352,864
Culver Educational Foundation (IN)	4,984,296
Phillips Academy Andover (MA)	4,869,277
Hockaday School (TX)	4,812,622
Kinkaid School (TX)	4,080,796
Taft School (CT)	3,601,454
Choate Rosemary Hall (CT)	3,014,927
Holland Hall School (OK)	3,013,499

percent of total support, up from 18.7 percent given for this purpose in the previous year. The experience of the core institutions confirms these patterns. Unrestricted gifts rose 31.5 percent in the 326 core schools. Gifts for physical plant rose 42.9 percent, a large percentage increase but a small dollar amount.

In most previous years capital purposes received more support than current operations. In 1981-82 gifts for capital purposes reached a record 67.3 percent of the total, versus 64.2 percent in 1980-81. The core institutions reported a 36.4 percent rise in capital gifts but only an 11.9 percent expansion of support for current operations.

Table 9 shows how the donor groups divided their gifts between capital purposes and current funds. The three donor groups providing the smallest shares of total support concentrated their gifts on funds for current operations in ratios ranging from a high of 7:1 to a low of 1.1:1. The three groups accounting for the major portion of all contributions gave anywhere from two to four times as much for capital purposes as for current operations. Corporations channeled slightly more than half of their grants to capital purposes in 1981-82.

A breakdown of corporate gifts by purposes is shown in **Table 10**. Although more than half of corporate support is still unrestricted, designated funds got a larger share in 1981-82 than in 1980-81.

Note: The year-to-year changes shown in this table are not of equal significance. The total amount reported by any one class of institution from any one class of donor is subject to erratic behavior due to major fundraising drives, the timing of corporate and foundation programs, large bequests and other nonrecurring influences. This is particularly true of the smaller groups of institutions and the smaller dollar figures.

*Includes $115 million in bequests. See Appendix Table A.

**Includes $30.4 million gift-in-kind. See Appendix Table A.

*In every survey each institution is classified in the category appropriate to its status in that year. Since the status of many institutions has changed over the years, the data by category are not strictly comparable from one survey to another. See page 8 for a comparison of 1980-81 and 1981-82 data on an adjusted basis.

**Includes nonrecurring transfer of $105 million from the Emily and Ernest Woodruff Fund, Inc., to Emory University for unrestricted endowment.

†Includes $115 million in bequests. See Appendix Table A.

§Includes $30.4 million gift-in-kind. See Appendix Table A.

Table D

VOLUNTARY SUPPORT OF HIGHER EDUCATION, BY SOURCE AND BY PURPOSE

(Including percentage of Grand Total; dollar totals in thousands)

SOURCES	1972-1973 (1,020 inst.)	1973-1974 (988 inst.)	1974-1975 (986 inst.)	1975-1976 (991 inst.)	1976-1977 (1,006 inst.)	1977-1978 (1,065 inst.)	1978-1979 (972 inst.)	1979-1980 (1,019 inst.)	1980-1981 (928 inst.)	1981-1982 (1,101 inst.)

*Includes approximately $200 million of faculty salary endowment grants from the Ford Foundation.

**Includes $105 million nonrecurring transfer. See Appendix Table C.

†Includes $115 million in bequests from alumni for capital purposes and $30.4 million gift-in-kind from corporations for current operations. See Appendix Table A.

Colleges and Universities Reporting the Highest Totals

The 20 Colleges and Universities Reporting the Highest Totals of Voluntary Support:*

Harvard University†	$181,018,507
Yale University	82,162,299
Stanford University	76,966,527
California, University of-Los Angeles	63,032,616
Washington University†	57,219,874
Southern California, University of	56,555,220
Minnesota, University of	54,871,621
Cornell University	50,929,223
Columbia University	50,583,039
Princeton University	47,352,359
Massachusetts Institute of Technology	46,590,872
Michigan, University of	45,579,115
Illinois, University of	44,699,065
Chicago, University of	43,313,424
Pennsylvania, University of	42,317,010
Texas A & M University	40,797,795
Wisconsin, University of-Madison	40,172,696
Northwestern University	38,440,242
Johns Hopkins University	36,670,952
New York University	35,377,612

*Not included are two systems, each comprising multiple units.

California, University of (System)	130,928,127
Texas, University of (System)	91,471,283

†Includes bequests of $77 million to Harvard University and $38 million to Washington University from Edward Mallinckrodt, Jr.

The 20 Colleges and Universities Reporting the Highest Totals of Corporate Support:*

California, University of-Los Angeles**	$39,076,992
Illinois, University of	25,180,251
Stanford University	23,545,360
Harvard University	21,579,283
Massachusetts Institute of Technology	17,655,078
Michigan, University of	16,112,706
Indiana, University of	14,107,360
Arizona, University of	12,923,219
Columbia University	11,074,217
Georgia, University of	10,341,594
Pennsylvania, University of	10,308,975
Cornell University	9,846,813
Abilene Christian University	9,697,840
Southern California, University of	9,656,187
Minnesota, University of	9,206,639
Texas, University of-Austin	9,053,753
Texas A & M University	8,954,577
Louisiana State University	8,882,000
Wisconsin, University of-Madison	8,650,281
Rochester Institute of Technology	7,815,911

*Not included are two systems, each comprising multiple units.

California, University of (System)	60,086,173
Texas, University of (System)	16,620,171

**Includes newsreel film library valued at $30.4 million from Hearst Corporation.
